PREIN&NEWHOF BYRON CENTER MOVES TO NEW LOCATION

New office offers faster highway access, better conference rooms, more parking.

BYRON CENTER, April 2, 2007. The Byron Center Office of Prein&Newhof (P&N) has moved to 365 Eighty-Fourth Street SW, Suite 4.

The new 3,800-square-foot facility is located just west of US-131 – only 1.3 miles east of the office’s former location at 1360 Eighty-Fourth Street.

“We think our clients will notice a big improvement,” said P&N engineer and Byron Center Office Manager Rod Korhorn. “There’s more parking, a much larger conference room, and we’re just off the highway.”

The new office also has more space for employee offices and project files, both of which were overcrowded at the previous office.

“The new office space was designed just for us by First Companies, Inc,” said Korhorn, “It will help us work more efficiently and serve our clients better.”

Prein&Newhof began conducting business at its new Byron Center Office on Friday, March 30. The office has kept its previous telephone (616-878-9296) and fax (616-878-9452) numbers.

Celebrating more than 30 years of operation, Prein&Newhof is a full-service engineering firm that employs over 100 full-time personnel including: engineers, surveyors, drafters, geologists, chemists, communication specialists, and support staff. In addition to its offices in Grand Rapids, Holland, Byron Center, Muskegon, and Kalamazoo, the firm also maintains its own environmental laboratory adjacent to its headquarters in Grand Rapids.
